

Red Hook Highway Shared Services Study

For over a year, representatives from the Town of Red Hook, Village of Red Hook and Village of Tivoli have been exploring ways to improve services and save money by working more closely together on the delivery of highway and streets services.

At this final public meeting of the project, the study consultants will present the project results and describe the recommendations for implementing highway shared services in Red Hook.

For more information about the Highway Shared Services Study, or to download study reports before the meeting, please visit the project website:
